

Learn PyPDF - Basics

PyPDF is a Python library to work with PDF files.

You can read, merge, split, and extract text from PDFs.

Install it using: `pip install pypdf`

Loading a PDF

Use PdfReader to load a PDF file:

```
from pypdf import PdfReader  
reader = PdfReader('sample.pdf')
```

Extracting Text

Get text from a page:

```
page = reader.pages[0]
```

```
text = page.extract_text()
```

Merging PDFs

Combine PDFs using PdfMerger:

```
merger.append('a.pdf')
```

```
merger.append('b.pdf')
```

Summary

PyPDF helps you work with PDF files easily.

You learned installation, loading, reading, and merging PDFs.
